Copper Cabling Solutions
Category 6A RJ45 FTP Patchlock Leads

©2019 Connectix E&OE
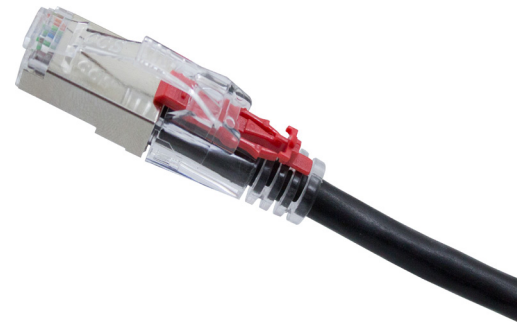

The Patchlock leads from Connectix provide extra security when installed in public areas as they prevent the risk of unauthorised disconnection of critical network connections. A Removal Key must be used to release the secure lock thus allowing the patch lead to be removed. The Connectix Cat 6A FTP Patch Leads are designed to exceed the performance requirements of the Cat 6A Specification. The fully shielded patch leads increase signal isolation and prevent contaminant noise from entering the cabling system.

Connectix Cat 6A Patchlock Leads are made from Connectix Cat 6A shielded cable and are terminated using high performance modular plugs. Each lead is individually factory tested to the standard to ensure true standard compatibility. Leads are available in lengths from 0.5 to 5 metres, and in several different colours.

Features & Benefits

- Individually performance tested
- Uses fully shielded cable
- Made to order in any length
- Offers enhanced security
- Removal tool required

Product Specifications

Plug	High performance 50 um gold plated
Cable	Category 6A shielded cable
Cable Shield	Overall braid and individually foiled pairs
Conforms to	ANSI/TIA-568-C
Boot & Secure Lock	Polycarbonate
Key	Polycarbonate
