

Connectix Continuous Professional Development Free Workshop Sessions

Connectix Cabling Systems is committed to investing in training courses and educational workshops as part of Continuous Professional Development (CPD) programs.

We run 2 accredited CPD Training Courses, as recognised by the CPD Certification Service*. Our courses are fully endorsed for CPD Points. These courses can be run either in person or online. Each one runs between 45-60mins and contribute points to members of CIBSE (1 point per course).

Introduction to PON

- A guide to PON and POL
- Understanding PON and the differences between this technology and a traditional structured cabling system
- Comprehend the design options and key components
- Understand the key commercial and technical benefits of the solution
- To be confident in engaging with clients and suppliers to consider these options for future projects

Fibre Integrated Reception Systems (FIRS)

- Introduction to FIRS platforms – OTX and Overlight
- EDFA Technology
- DWDM Technology
- Hybrid Systems
- Design examples and challenges
- Future of IRS and the evolution of TV over IP
